

Handicare is recruiting a Product Development Engineer, Mechanical Design

Handicare offers solutions and support to increase the independence of disabled or elderly people, and to enable them to live an active life — on their terms — and to facilitate for their care providers and family.

We are a global company with sales in more than 20 countries and are a market leader in this field. The head office is in Stockholm, Sweden and manufacturing is located at six sites distributed across North America, Asia and Europe. In 2017, revenue totalled MEUR 285.

We are a team of some 1150 employees and are passionate about what we do. Our commitment is tied to our awareness that our efforts make a difference in the lives of individuals. We are also driven by the ongoing need to continuously improve, enhance and develop our solutions. We are “Making everyday life easier”!

Our global Product Development Team is spread between North America and Europe, and for our Development Centre in Sweden, specialized in mobile and ceiling lifts, we are recruiting to further expand our Product Development Team.

Reporting to the Product Development Manager, the role will give you the opportunity to grow in a truly international company. You will be responsible for developing new products and maintain and improve the existing portfolio.

The role is based at the Handicare office in Stockholm, Sweden.

The key responsibilities of the role are to:

- Manage Development projects to design and industrialize new products, floor lifts in particular
- Optimize existing products in collaboration with Product Managers, Operations, Procurement, Sales and Quality, aimed at lowering overall costs and improving quality (VA/VE analysis, resourcing, in-/outsourcing) while following the quality standards for Medical Devices
- Participate in resolve supplier, manufacturing and field quality problems
- Organize rigorous and continuous testing of products to make sure the quality exceeds customer expectations
- Be an active member of the Group Product Development function, take the lead on selected Group initiatives

Your background:

You have a Master of Science degree in Mechanical engineering or equivalent and min. 3 years of experience from demanding industries (aerospace, automotive, medical) in mechanical and/or electrical product development. You should also have experience in FEM analysis and product development with functional specifications.

Your English is fluent. Swedish, and any other European or Asian language is an asset.

To apply

We are looking forward to receiving your application (in English) as soon as possible or at the latest on the **19th of June 2019**. Selection and interviews are ongoing, so hurry up, the position may be assigned earlier.
